TAPING

The Cyklop CM 125 is a Thermal Inkjetprinter, with a printing height of 25.4 mm. This printer is based on proven and existing Cyklop printers.

Due to its compact design, this printer is easy to assemble on case sealers, conveyor belts and / or labeling machines. Using proven and reliable cartridge technology, the CM 125 is a robust, maintenance-free thermal inkjet printer that is suitable for placement in a wide rang of industrial environments. This printer does not contain expensive wearing parts, making (high) costs for parts and / or repairs a thing of the past.

User friendly

The CM 125 printer has a storage capacity of 100 different programs. With the included wireless keyboard and Bluetooth control through an android app, the information to be printed can be easily created or sent to the printer.

The design software and the intuitive user interface offers this printer the ability to individualize packages professional, fast and efficiently. Printing information as text, date, time, logo, barcodes is possible with a high resolution up to 300 dpi.

Kit inclusions

- Built in sensor
- Mounting brackets
- Anti-shock mechanism
- Bulk Ink delivery system (optional)
